WORK EXPERIENCE

Team Manager and Developer | Mainstream Basketball Club

June 2025 - Present

- Managed end-to-end planning and execution of the 2026 Mainstream Basketball Championship, coordinating budgets, venues, schedules, and multiple stakeholders through to successful completion.
- Designed and developed the official Mainstream Basketball Club website, in addition to managing the club's programs and operations.
- Coordinated with venue partners, sponsors, and program participants to align logistics, resolve issues, and keep the event on schedule.
- Communicated with team members and external partners to track deliverables, address risks, and ensure smooth day-of execution.
- Oversaw resource allocation and volunteer/staff coordination across the duration of the program.

Full Stack Developer, Co-Founding Team Member / *Studex Student Service Platform*

January 2026 – Present

- Co-founded and developed a student-focused service platform connecting students with student vendors for seamless service booking and business record management.
- Designed and built end-to-end features across the full stack using modern web technologies, covering both front-end interfaces and back-end APIs.
- Implemented RESTful APIs and database schemas to support service listings, bookings, and vendor management workflows.
- Integrated user feedback loops from alpha and beta testing phases to iteratively improve the platform experience for both vendors and service consumers.
- Conducted structured alpha and beta testing to identify bugs, validate features, and ensure platform stability prior to launch.
- Collaborated with the founding team to define product direction, prioritise features, and maintain a consistent and accessible user experience.

Product Manager, Front End Developer / *Mustard Innovations and Technologies*

2025 – September 2025

- Oversaw project planning and execution from concept to delivery.
- Fostered effective communication and collaboration among cross-functional team members.
- Worked closely with developers to align technical implementation with product goals.
- Led the team to ensure timely completion of deliverables and product quality.

Data Analyst — Summer Intern / *Bizmarrow Technologies Ltd, Abuja, Nigeria*

July 2024 – September 2024

- Conducted data analysis using Excel, Power BI and Tableau to deliver actionable insights.
- Assisted in creating dashboards for monitoring key performance indicators (KPIs).
- Collaborated with cross-functional teams to improve data collection and ensure accuracy.

OTHER EXPERIENCE

Member, Sponsorship and Partnership Team / *TEDx PAU Volunteer*

October 2024 – November 2024

- Assisted the team in organising sponsors and partners for the event.
- Assisted in making the sponsors and partners comfortable throughout the event.
- Made sure the sponsors were able to connect and reach out to students advertising their brands.
